

S&D Coffee, Inc., a growth oriented, World Class Beverage Industry Leader based in Concord, NC, seeks a:

MECHANICAL ENGINEER

Will be responsible for assuring proper technical process performance and developing and implementing capital expenditure programs to maintain and/or upgrade the performance. Duties include developing, proposing and implementing process and mechanical optimization programs, modifications to operations, and capital permit/projects within time and budget constraints; collecting and analyzing process data; and interfacing with external engineering firms, contractors and vendors on all permit and project related technical issues associated with project development and execution, including scopes of work, bid documents, and equipment specifications.

Requires a BS degree in Mechanical Engineering; demonstrated ability to successfully manage and implement projects; proficiency in AutoCAD; and effective problem-solving, communication and interpersonal skills. Prefer closed-loop, liquid food processing experience; strong working knowledge of PLC programming; technical expertise within the functional areas of electrical and process engineering; and experience with hot fill systems.

Competitive salary, Comprehensive Benefits Package and 401k Retirement Plan
