

December 2008

Dear Friends,

Another year has passed, and Cup is extremely pleased to have been able to help hundreds of children in coffee-growing communities around the world. In order to continue on our path providing education to children, your support and contributions are greatly needed. We currently fund several projects, and have the following projects in the works. With your support we hope to reach our goals to continue making them a success.

Nicolás Chacón Vargas Elementary School
Los Angeles, Sabanilla

Goal - \$2,500

In the district of Alajuela, near Poas Volcanoes, these schools serve some of the poorest children of the surrounding coffee communities. Your donations can help make badly needed repairs to the school building servicing kindergarten, and primary school age students.

Final Construction Rural Secondary School-ASPAP
Murojaga, Salas, Lambayeque

Goal - \$2,000

In the village of Murojaga, parents have done the groundwork in order to obtain authorization for the building of the Secondary School. They have constructed two rooms, one for the students and another for the administration. They still need: to build a cement floor in each class to avoid the weakening of the walls from the rains, plaster and paint both classrooms, shelves for the library, and ten 2-person desks.

Soppexcca
Jinotega, Nicaragua

Goal - \$5,000

One of Cup's original partners, we hope to continue to fund a traveling teacher and other necessary materials to improve the educational environment of the communities for another year.

Any amount you can contribute is greatly appreciated. With Coffee Holding Company supplying the necessary administrative costs to run our organization, we are able to maximize our donations to the fullest. Cup For Education is proud to say 99% of our donations go directly to fund our projects.

Wishing each and every one of you Happy Holidays with family and friends.
